Relevant Course Work

Remote Sensing | The University of Iowa | Iowa City, IA

2026

- Interpreted Lidar data and aerial imagery in ArcGIS Pro using LasTools, the Agricultural Conservation Planning Framework (ACPF), measuring NDVI, model builder, classifying data, and cleaning up data tables in Excel.
- Used the Leica ScanStation C10 to collect terrestrial Lidar data with the correct technique so the most accurate data would be obtained.
- Conducted visual, supervised, and unsupervised classifications on an area of interest.

Introduction to Geographic Databases | The University of Iowa | Iowa City, IA

2025

- Created a geographic database using PgAdmin, qGIS, and SQL to answer spatial queries regarding correlations between crop boundaries and various health variables.
- Created ER diagrams to better understand how datasets were interconnected, making it easier to evaluate what data makes sense for various products and applications.

EXPERIENCE

Lab Safety Monitor | *University of Iowa Chemistry Department* | Iowa City, IA

August 2025– Present

- Ensured the safety of students by verifying lab procedure was followed.
- Followed proper hazardous waste management by labelling, properly containing, and disposing of waste.
